## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to Cutting Tool, classified in class 407, subclass 118.
- II. Claims 9 and 10, drawn to Process of Machining, classified in class 82, subclass 1.11.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the apparatus can be used for other processes other than for machining a scroll member of a scroll compressor (e.g. manufacturing a work piece with perpendicular intersection).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Yasuo Muramatsu on 2/8/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3722
